Internationa	International Patent Classification (IPC) or national classification and IPC									
F16D48/06										
Applicant DAIMLERCHRYSLER AG										
1. T	This report is the international preliminary examination report, established by this International Preliminary Examining Authority under Article 35 and transmitted to the applicant according to Article 36.									
2. T	his REPORT consists	of a total of	4	sheets, includin	g this cover sheet.					
3. T										
a	. Sent to the	applicant and	l to the International Bureau) a total of	sheets, as follows:					
	sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications authorized by this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions).									
	sheets which supersede earlier sheets, but which this Authority considers contain an amendment that goes beyond the disclosure in the international application as filed, as indicated in item 4 of Box No. I and the Supplemental Box.									
b	b. (sent to the International Bureau only) a total of (indicate type and number of electronic carrier(s))									
					, containing a sequence listing and/or tables					
			r readable form only, as incarrative Instructions).	licated in the Supple	emental Box Relating to Sequence Listing (see					
4. T	his report contains inc	lications relat	ing to the following items:							
	Box No. I	Basis of the	e report							
	Box No. II	Priority								
	Box No. III	Non-establ	ishment of opinion with reg	ard to novelty, inven	tive step and industrial applicability					
	Box No. IV	Lack of un	ity of invention							
	Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement									
	Box No. VI Certain documents cited									
[Box No. VII	Certain de	fects in the international app	lication						
	Box No. VIII Certain observations on the international application									
Date of submission of the demand			Dat	e of completion of the	his report

1.	Statement				
	Novelty (N)	Claims	1-8	YES	
		Claims		_ NO	
	Inventive step (IS)		1-8	YES	
		Claims		NO	
	Industrial applicability (IA)	Claims	1-8	YES	
		Claims		NO	
ı					

2. Citations and explanations (Rule 70.7)

This report makes reference to the following document:

D1: EP-A-1 319 856 (ISUZU MOTORS LTD) 18 June 2003 (2003-06-18)

1. Claim 1

1.1 Prior art

D1, which is considered to be the closest prior art, discloses a device for actuating a torque transmission unit according to the preamble of claim 1.

1.2 Problem

Thus the problem to be solved by the present invention can be regarded as that of devising a device with which changes within the torque transmission unit can be simply and reliably taken into account.

1.3 Solution

International application No.
PCT/EP2004/008086

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

The invention solves this problem in that the sensed characteristic variable is determined from a variable that is dependent on a difference in speed within the torque transmission unit and in that the unit switches the actuator into the subsequent mode as soon as a characteristic variable determined from the value of difference in speed is smaller than a predetermined percentage of a maximum sensed value to which this characteristic variable has become equal in the time period that has elapsed since the start of the closing process.

This solution is neither known nor obvious from the available prior art, and the subject matter of claim 1 is therefore novel and inventive.

2. Claims 2 to 7

Dependent claims 2 to 7 relate to further embodiments of the invention.

3. Claim 8

Claim 8 relates to a method using the device according to claim 1, and is therefore also regarded as novel and inventive.
